

FREQUENTLY ASKED QUESTIONS

How does AGS Technology assure continuity of supply?

- AGS has developed strong relationships with a wide network of brokers, dealers, collectors, and generators.
- AGS does not rely on any single source or feed stream of recycled raw material.
- AGS inventories large safety stocks since recycled raw material only becomes available when it is generated.
- Fallback or contingency plan is to use virgin raw material at no additional cost to the customer.
